# SpendWise

Your financial companion, just a tap away!

Project for the start2impact  
FullStack developer course.

I created a personal expense  
management website using  
React, Laravel and mySql

Aligned with the 2030  
Agenda for Sustainable  
Development

Managing finances can be a daunting task for many people. One of the biggest challenges is keeping track of expenses.

With so many different payment methods available, it can be difficult to keep track of where your money is going.

This is especially true if you use cash frequently, as it can be hard to remember every purchase you make.

# SpendWise features

Keep track of your expenses by organizing them by months and monitoring your cash flow.

This feature helps you understand where your money is going and identify areas where you can cut back

When choosing a financial management site, there are several factors to consider. One of the most important is cost. Some sites offer free basic plans, while others require a monthly or annual subscription fee for access to premium features.

SpendWise is completely free and always will be!

It is also easy to use, intuitive and suitable for any platform

# Conclusion

In conclusion, managing financial expenses can be a daunting task but using a financial management site can make it easier. By using a site, you can automatically categorize your expenses, track your spending in real-time, and customize your budgeting tools. This can help you save time and money while also giving you more control over your finances
